Software Testing Questionnaire.

Since this is beta version software, we are interested in learning about any problems with the software or of any improvements you think could be made.

As you are working through the program please note any problems or errors you encounter. We are especially interested in feedback on the following:

Clarity of instructions:

Did the program always react in the way you expected? If not, describe the problem:

Audio quality:

          poor   fair   good   excellent

At any time were you unsure as to how to proceed? If so, describe:

Please note any error messages you encountered:

Is there anything you would change about the program?

What did you especially like about the program?
